(a) planar, $\mu = 0$: force trace to crash
$|F_{N,y}|$ on Beam X [N]
time [s]
crash t=8.74 s
(slide 0.262 m)
(b) side view, last converged step=8 (t=8 s)
next step (t=8.74s in-progress) never converges
y [m]
z [m]
(c) top view (x-z): Beam Z is EXACTLY planar
max—x— over all steps = 0.0e+00 m
z [m]
x [m]
